

DISCOVER THE SIMILARITIES AND DIFFERENCES BETWEEN OUR

L3 Y L3+  
MONITORS

LYCAN  
FITNESS EQUIPMENT

CONNECTIVITY

L3:  
COMPATIBLE  
WITH KINOMAP

L3+:  
COMPATIBLE WITH  
KINOMAP AND DFIT  
(Zwift only when used on the Ergo Bike)

DISPLAY DESIGN

The screen layout is slightly different between both models.

L3

L3+

GENERAL COMPATIBILITY

L3

L3+

- Not compatible with earlier models (e.g., first-generation skier or rower consoles).
- Can be used with Concept2 rowers and ski ergs.
- To use it with other Lycan machines, the following changes are required:
  - Sensor cable
  - Mounting bracket
  - Generator
  - Monitor

*Note: The process is possible, but complex.*

- Each machine comes with its own independent L3+ monitor. This means that there is a dedicated monitor for each one: rower, skier, and ergo bike.
- The generator and sensor cable for the rower and skier are compatible with each other, so they can be used interchangeably with the monitors of these two machines.
- However, the generator and sensor cable for the ergo bike are unique and only work with their specific ergo bike monitor.
- Each L3+ monitor is compatible only with its corresponding Concept2 equipment, with the following exceptions and clarifications:
  - The L3+ monitor for the rower and skier is compatible with Concept2's RowErg.
  - The L3+ monitor for the Elite Skier is compatible with Concept2's SkiErg.
  - The L3+ monitor for the Ergo Bike is not compatible with any Concept2 bike model.

MACHINE INTERCHANGEABILITY

To adapt the L3+ monitor between different machines, specific components are needed:

Origin/Destination	Required Parts
Rower L3+ ↔ L3	Console + Cable
Skier L3+ ↔ L3	Console + Cable + Generator
Rower L3+ ↔ Skier L3+	The sensor cable and generator are compatible. The monitor can be updated via software rather than being physically replaced.
Rower/Skier L3+ ↔ Ergo Bike L3+	It is not compatible; the Ergo Bike uses a specific console, sensor cable, and generator.

PHYSICAL APPEARANCE

There are no significant external hardware differences between the two consoles. The L3+ monitor will have its model abbreviation printed in the upper right corner.

ROWER (L3+)

SKIER (L3+)

ERGO BIKE (L3+)

COMPATIBILITY WITH OLDER CONSOLES

Compatibility with older or first-generation Lycan rowers and skiers is virtually nonexistent or requires substantial hardware updates and part replacements.
